Mixer Technology at its Best

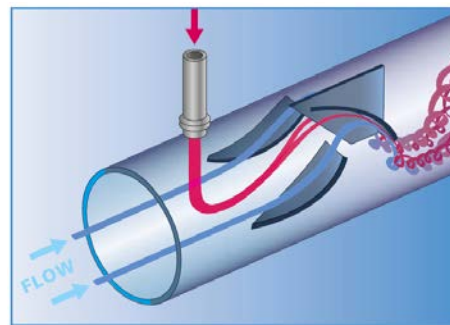

See the Westfall 6000 Counter-Swirl Mixer will at Texas Water 2026 – and see why engineers prefer it.

Mixing in Only 3 Diameters

The Westfall Model 6000 Counter-Swirl Static Mixer is proven to provide complete mixing in just 3 diameters. Its compact efficiency is unbeatable.

Talk to Our Engineers

We love problem-solving and hearing about your mixing challenges. We can show you examples of the CFD (Computational Fluid Dynamics) analyses that we use to design innovative mixers for our customers and to do performance testing. We use data driven decision-making to determine which mixer will perform best for a given application.

Do stop by our **Booth 667** at Texas Water 2026 in San Antonio, TX.

We Look Forward to Seeing You There

Trade shows are a great opportunity to have conversations with our reps and customers and learn about your water treatment applications. We take great pleasure in providing high performing, easy to install mixers, with very low maintenance.
