

WESTFALL

Join us at

June 21st – 24th, Booth #1224

• Walter E. Washington Convention Center, Washington, DC•

We Hope to See You There

Do stop by our [Booth 1224](#) at AWWA ACE 2026 in Washington, DC. We'd love to chat with you about your mixing challenges. Problem solving is one of our favorite things.

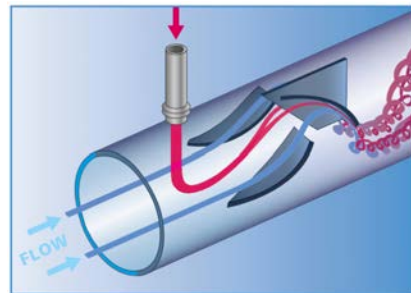

Talk to Our Engineers

We're happy to show you examples of the [CFD \(Computational Fluid Dynamics\)](#) analyses that we use to design innovative mixers for our customers and to do performance testing.

See Our Favorite Mixers

We have innovative mixer hardware and videos on display. We're especially proud of our [Model 6000 Counter-Swirl Mixer](#), which is proven to provide complete mixing in just 3 diameters. It's particularly good in low headloss situations.

Another prominent performer is our [Model 2800](#), seen at the left in the photo. It is an economical workhorse with long-lived excellent performance, short lay length and virtual no maintenance required.

Westfall Model 6000 Counter-Swirl, Low Headloss Mixer

Stop By and Say "Hi"

Trade shows are a great opportunity to have conversations with our reps and customers and learn about your water treatment applications. As always, we provide high performing, easy to install mixers, with very low maintenance.
